Topic: General Press Release

FOR IMMEDIATE RELEASE

### **IT That Works<sup>SM</sup> Increases Capacity of A Better Outlook**

Bingham Farms, Michigan, December 12, 2009 – IT That Works<sup>SM</sup>, a BTR Associates LLC affiliate, and a Microsoft Gold Certified Partner, announces that it has increased the amount of storage for email accounts for all usage plans. Robert Breitman, BTR President and CEO, commented that, “We wanted to provide additional value to our clients and pass on the savings we enjoy from reduced hardware costs”. He further stated that, “...notified our current clients of the change and that there are no increase in their fees.”

IT That Works<sup>SM</sup> is the largest Microsoft Certified hosted exchange provider in the Midwest. Because of their economies of scale they are able to offer no fees for initial setup of account (which some competitors charge extra) and they provide world class antivirus and ant spam protection as an included service.

Mr. Breitman encourages all business owners to visit [www.abetteroutlook.com.com](http://www.abetteroutlook.com.com). The details of this innovative approach to providing hosted exchange, mobile access, and archiving and compliance can be found there.

About IT That Works<sup>SM</sup>
